## **Description:**

The Super Strobe ABL combines three functions in one fixture: It is equipped with 216 cold white SMD LEDs for both dynamic strobe effects and slower blinder effects. Furthermore, the reflecting surface of the stroboscope is illuminated with an extra 144 RGB LEDs creating colorful, atmospheric light effects.

Depending on the selected DMX mode, the color LEDs can be split in up to 48 individual control segments which can be used to create amazing color effects within the fixture.

The Super Strobe ABL has a very wide beam angle which makes both dynamic and calm light effects a great visual experience, even from a lateral view.

The fixture has 3-pin DMX connectors as well as a P-Con input and output to connect it to the mains. For a structured and versatile use, you can choose from 4 different DMX modes with 7, 13, 22 and 148 DMX channels respectively.
