Description:

Areca palms are among the most popular indoor plants for offices and living rooms due to their lush greenery. Get yourself an easy-care, evergreen eye-catcher in your premises with the artificial Areca from Europalms!

The artificial fronds of the palm are of different lengths and are made of PU. Like their natural counterparts, they have only one leaf stalk and look as if they were created from a single oval leaf. Since the first fronds were already attached at the bottom of the trunk in short shoots, the artificial plant has a particularly voluminous appearance.

The areca has a total height of about 180 cm and comes in a black gardener's pot, which gives the plant a stable stand when placing it in a planter.
