Description:

Make your life easier with this artificial plant! Cyprus grass is one of the most popular houseplants. However, the grass-like marsh plant, originally from the tropics and subtropics, requires a special location: bright, airy, warm - but without direct sunlight and not directly next to a heat source. With the artificial Cyprus grass, unlike its natural model, you are not bound to any site conditions.

During the production of the artificial grass, a lot of attention was paid to a naturalistic finish: Its elongated, narrow hanging leaves are made of textile and form an umbrella-like crown of leaves with small inconspicuous flowers in the center. These sit on tall, bush-like stems. The artificial plant has a total height of about 76 cm and comes in a plain gardener's pot covered with artificial soil, which gives the plant a stable stand when placed in a planter.
